

Polyurethane film backing

- Water proof, bacteria barrier
- Prevent external friction
- Managing the micro environment

SAF absorption&retention layer

- Enhance absorption capacity
- Improve the water-locking performance

Tri-star embossed design

Non-woven distribution layer

- transfer the exudates to the super absorbent layer

Foam absorbent layer

- prevent wound maceration
- provide a moist wound environment
- reduce the risk of infection

Silicone wound contact layer

- Gentle self-adhesive
- Provides gentle care for fragile and sensitive skin

SILICONE FOAM DRESSING

◇ With Border

DESCRIPTION

Alexer® silicone foam dressing-with border is useful for moderately to high exudating wounds, such as post-operative wounds, sacral bedsore wounds, pressure ulcers, diabetic foot ulcers, venous leg ulcers, neuropathic ulcers, arterial ulcers, post-operative, I - II degree burns etc.

APPLICATIONS

A versatile dressing

These absorbent foam dressings are suitable for covering moderate to heavily exuding wounds.

Super absorbency

The premium foam pads can absorb 10 times of drainage to minimize skin maceration risk.

Effective wound care

Helps to improve wound progression by maintaining a moist wound environment.
