

# Alexer®

## SILICONE SCAR SHEETS

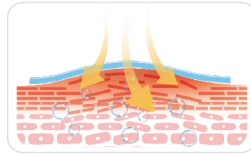

# FUNCTIONS

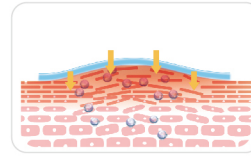

Clinically proven to reduce and flatten old and new scars.

It reduces, flattens and smooths scars by providing a combination of occlusion (seals the scar from exposure to air), hydration, elevated skin temperature and continuous light pressure.

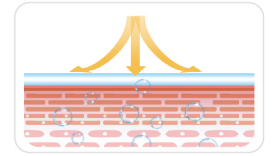

For best results, we recommend Alexer® silicone scar sheets to pair with our silicone sheeting for around-the-clock scar management.

Repair damage

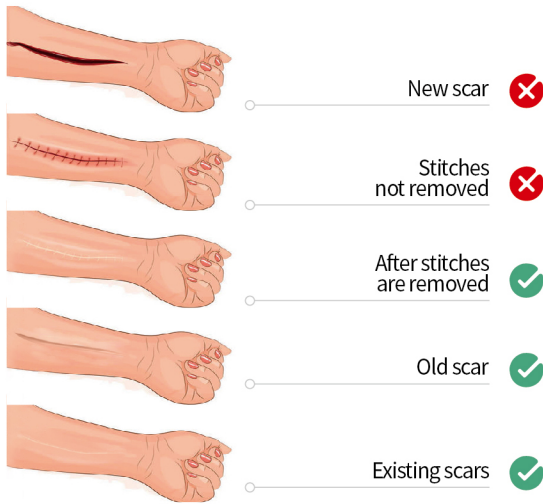

Smooth scars

Skin regeneration

## When to start using

## Suitable for all kinds of scars

C-sections

Surgery

Acne

Burn

Plastic surgery scar

Thyroid scar
